PART I—POPULATION AND VITAL STATISTICS

Note—For dates subsequent to the latest population Census the estimated population represents the population ascertained at the Census plus natural increase and recorded net migration since the Census. As complete records of migration are not available, the population estimates so derived are subject to revision when the actual population is ascertained at the next Census. The figures for periods between the Censuses of 1954 and 1961 have been revised in accordance with the results of the 1961 Census.

Full-blood aboriginals are not included in the following tables. The number in Western Australia on 30th June, 1961, was estimated to be 10,000.

(‡) Figures shown for a Local Government Area or Statistical Division do not necessarily relate to the numbers of births, deaths or marriages actually occurring in that area. Births are allocated to the usual place of residence of the mother, deaths to the usual place of residence of the deceased and marriages to the usual place of residence of the bridegroom. Cities are marked (C), Towns (T); all other Local Government Areas are Shires. (*a*) Excluding stillbirths.

Note.—The Local Government Area designations and names used in this table are those which were current on the 31st December, 1964.

The Shire of Exmouth was constituted, with effect from the 1st January, 1964, by severance of territory from the Shire of Gascoyne-Minilya.

No. 13—Gross and Net Reproduction Rates and Birth Rates per 1,000 Women

Item	Western Australia		Australia	
	1954	1961	1954	1961
Gross Reproduction Rate (*a*)	1·772	1·780	1·558	1·724
Net Reproduction Rate (*b*)	1·704	1·712	1·497	1·658
Birth rate per 1,000 women (age 15 and over)	74·40	69·97	63·47	65·84
Birth rate per 1,000 women (ages 15 to 44 inclusive)	121·35	119·38	107·59	114·13
Ex-nuptial birth rate per 1,000 women (age 15 and over)	3·33	3·93	2·52	3·37
Ex-nuptial birth rate per 1,000 women (ages 15 to 44 inclusive)	5·42	6·70	4·27	5·83

(*a*) The gross reproduction rate is a measure of the number of female children who would be born on the average to every woman who lives through child-bearing age, assuming that the basic fertility rates remain unaltered.
(*b*) The net reproduction rate allows for the effect of mortality and is a measure of the number of women who in the next generation, will replace women of reproductive age in the current generation.

No. 17—Causes of Death: 1964

Statistics of causes of death in Australia from 1958 are based on the Detailed List of the 1955 Revision of the International List of Diseases and Causes of Death. Certain categories have been grouped to facilitate publication, but in all cases the detail required for the Intermediate List of 150 Causes has been preserved, in accordance with World Health Organization Regulations. In general three-digit categories are used, but some four-digit sub-categories have been included to meet Australian requirements.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound	=	2 dollars ($2)
1 shilling	=	10 cents (10c)
1 penny	=	$\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equal in value to eight shillings sterling or $US 1.12.

Rounding of Figures—Many of the figures appearing in the tables have been rounded (to thousands or, in some cases, millions), without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

No. 3—Consolidated Revenue Fund : Revenue and Expenditure classified according to Function

This table is designed to show (in respect of the Consolidated Revenue Fund only) the gross and net cost of each function of Government irrespective of the Department or Departments administering these functions. In cases where an activity is such that it involves more than one function, each of its components has been included in that function which is considered to be the most appropriate. For example, in classifying revenue and expenditure attributable to the care of aboriginals, the education of natives is included in " Education ", and hospitals for natives in " Public Health ", only the balance being assigned to the item " Welfare ".

Certain functions are performed by semi-government authorities and do not affect the Revenue Fund with the exception of Public Debt operations and various subsidies and recoups, *e.g.*, Electricity, Banking, Insurance, Roads. In other cases the Revenue Fund recoups certain losses or receives surplus profits from public enterprises. Public Debt Charges are shown as a separate function.

(*b*) From 1962–63, a revised classification of Hospital Benefits has been adopted following an amendment to the National Health Act operative from the 1st January, 1963. (*c*) Figures exclude payments and reimbursements from Consolidated Revenue Fund in respect of capital expenditure by the State Government ; see Table No. 12. (*d*) Represents the Commonwealth's contribution of three-fifths of rental losses incurred under the Commonwealth and State Housing Agreement Act, 1945.

No. 14—Summary of Commonwealth Government Net Taxation Collections in Western Australia

NOTE—The figures in this table represent the amounts collected in Western Australia but do not necessarily indicate the amount contributed by the people of the State, as moneys may be collected in one State in respect of goods consumed in, or assessments made on account of, other States. Further, administrative arrangements for the collection of certain taxes are such that a large proportion of the revenue (or, as in the case of Wheat Tax, the whole of the revenue) is brought to account in a State other than Western Australia.

SECTION 5—TAXATION

No. 15—State Taxation : Net Collections

NOTE—Collections are grouped according to the nature of the tax rather than the method of collection. Thus stamp duties on betting tickets and revenue from bookmakers' licences and totalisator licences are included under the heading " Racing " and not under " Stamp Duties " or "Licences."

The figures shown comprise payments to Consolidated Revenue and trust or special accounts. They include earnings from some types of licences which are treated as departmental revenue, and not as taxation, in the Public Accounts. For purposes of comparison with other States, vehicle registration fees and passenger and carriers' licence fees collected by local government authorities outside the Metropolitan Traffic Area are also included. At the foot of the table there appears a reconciliation between the aggregate net collections for the year 1964–65 and the total of the item " Taxation " in Table No. 1.

ANALYSIS OF ASSESSMENTS UNDER THE COMMONWEALTH INCOME TAX AND SOCIAL SERVICES CONTRIBUTION ASSESSMENT ACTS

NOTE—Tables Nos. 16 to 21 inclusive have been compiled from information supplied in returns made to the Commissioner of Taxation. The information relates to assessments issued during a period of fifteen months, in the case of individuals, and eighteen months in the case of companies, after the close of the year of income.

The term "Central Office" appearing in some of the tables refers to the central office of the Taxation Department. Statistics of assessments issued by each State office and by the central office are compiled separately. Assessments issued by the Western Australian office cover taxpayers who derive income only in Western Australia, while those issued by the central office cover taxpayers who derive income (other than salary and wages and dividends) in more than one State and taxpayers whose income is derived wholly from sources outside Australia. In Table No. 16, particulars of central office taxpayers resident in Western Australia have been included. Tables Nos. 18 to 21, which relate to companies, include only those assessed in Western Australia.

"Actual Income" may be defined briefly as "gross income (including exempt income) *less* expenses incurred in gaining that income." ("Exempt income" includes war and service pensions, social services benefits, income from gold mining and certain income derived from overseas if the income is taxed in the country in which it is derived.)

"Taxable Income" is equal to Actual Income *less* Exempt Income and Allowable Deductions, the more important of which are described in the *Pocket Year Book of Western Australia*.

SECTION 6—LOCAL GOVERNMENT FINANCE

NOTE—For further details see Part XI of *Statistical Register of Western Australia.*

For 1960–61 and previous years, the financial year for Road Boards (now Shires) ended on the 30th June, and for former Municipalities (now Cities or Towns) on the 31st October. The Local Government Act of 1960, which came into operation on the 1st July, 1961, specifies a financial year ending on the 30th June for Cities, Towns and Shires. For 1961–62 the financial statistics of former Municipalities are for the eight months from the 1st November, 1961 to the 30th June, 1962.

SECTION 3—FIRE, MARINE AND GENERAL INSURANCE

NOTE—*The tables in this section have been compiled from returns submitted by insurers transacting business in Western Australia.*

The returns do not relate to a uniform period, the actual period varying according to the financial year of individual insurers.

The statistics shown conform substantially to the following definitions and should be interpreted accordingly.

(i) Premiums represent the full amount receivable in respect of policies issued or renewed during the year, less returns, rebates and bonuses paid or credited to policy holders during the year. They are not adjusted to provide for premiums unearned at the end of the year and consequently the amounts differ from "earned premium income" appropriate to the year. When figures are increasing, as in recent years, premiums receivable (as shown in the tables) are greater than "earned premium income" appropriate to the year. The converse applies when figures are declining.

(ii) Claims include provision for outstanding claims and represent claims or losses incurred during the year. Salvage and other amounts recoverable have been deducted.

(iii) Contributions to Fire Brigades, Commission, Agents' Charges and Expenses of Management represent mainly charges paid during the year.

(iv) Taxation represents mainly payments made during the year and includes Income Tax, Pay-roll Tax, Licence Fees, Stamp Duty (where paid by the company), etc. Income Tax paid during the year is based on the income of earlier years.

The tables contain selected items of statistics and the information shown is not suitable for the construction of a "Profit and Loss" statement or "Revenue Account."

NOTE

Rounding of Figures—Many of the figures appearing in the tables have been rounded to thousands without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :

1 pound	=	2 dollars ($2)
1 shilling	=	10 cents (10c)
1 penny	=	$\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equivalent in value to eight shillings sterling or $US 1.12.

PART IV—TRADE, TRANSPORT AND COMMUNICATION
1962-63 to 1964-65

The previous issue of Part IV of the *Statistical Register of Western Australia* contains statistics up to June, 1962. This issue brings the statistical series forward to June, 1965.

List of Statistical Publications .... *following Table 57*

SECTION 1—OVERSEA AND INTERSTATE TRADE

Year of Record

In all tables, the particulars shown relate to the year ended 30th June.

Sources of Statistics

Statistics of oversea trade are compiled from documents supplied to the Commonwealth Bureau of Census and Statistics by the Department of Customs and Excise. These documents are carbon copies of import and export entries submitted to the Department by importers and exporters or their agents, as required by the Customs Act 1901–1966. Particulars of Western Australia's oversea trade presented in this publication have been prepared from tabulations furnished by the Commonwealth Bureau of Census and Statistics, Canberra.

Statistics of Western Australia's trade with other Australian States are compiled from information contained in documents collected under the authority of the Census and Statistics Act 1905–1949 from importers, exporters and other persons concerned with the distribution of goods.

Classification of Commodities

Oversea trade information is classified in accordance with a Statistical Classification of Imports and Exports prepared by the Department of Customs and Excise. It comprises some 3,700 items of imports and about 1,300 items of exports grouped into 27 classes and sub-classes as shown on page 7. Particulars of interstate trade are tabulated in accordance with a classification which is, in general, an abridgement of that used in connexion with oversea trade and contains some 1,000 items of imports and 450 items of exports.

The classifications are subject to continuing revision. Items may be added or deleted, or descriptions varied in order to make them truly comprehensive of the goods which they are designed to cover. The item number assigned to a particular commodity will therefore not necessarily be the same from year to year, nor will it always be the same for imports and for exports in a single year.

For the purpose of recording interstate trade, the number of separate items in some commodity groups of the oversea trade classification has been expanded to take account of items of particular importance in Western Australia's trade with other States. In most commodity groups, however, items have had to be combined because it is not possible to obtain the detailed information which is available in relation to oversea trade. For this reason, among others, the number used to identify a particular commodity in this publication will not be the same as that used in the bulletin *Oversea Trade*, which deals with the external trade of Australia and is published annually by the Commonwealth Statistician, Canberra.

Where a description is identical in both classifications it is possible to present details, as in Tables 1 and 2, of both oversea and interstate trade in respect of the commodity concerned. (An example is Item 120—Cheese.) Some descriptions occur only in respect of oversea trade, and details of interstate trade in regard to them are therefore not recorded separately. In these cases, the relevant particulars have been included in the appropriate commodity group, under a residual item. Commodities which have been dealt with in this way are marked (†) and footnoted accordingly. (An example of this treatment is provided by Items 1591–8.)

Units of Quantity

In this publication quantities are generally, but not invariably, expressed in terms of the normal trade unit. Where *cental* is used, the unit is equivalent to 100 lb. avoirdupois. *Gallon* refers to the imperial gallon of 277¼ cubic inches capacity.

Quantities are not given in cases where there is no appropriate common unit (for example, an item, or a class such as Class XIII(B)—*Leather and Leather Manufactures*, which covers a number of commodities and cannot be recorded under a uniform unit of quantity).

Valuation

All values are recorded in Australian currency. The basis of valuation used, except in the case of imports from other Australian States, is *f.o.b.*, or its equivalent, at the port of shipment. Statistics of imports from other Australian States are recorded in terms of landed cost.

Oversea Countries

The term *Country of Origin* used in import tables should be taken to mean the country of production. *Country of Destination* appearing in export tables means the country to which the goods were consigned, so far as this can be determined at the time of export.

Countries are arranged in two divisions, *Commonwealth* and *Foreign*. Commonwealth countries include protectorates, trust territories and territories under condominium. In Tables 1 and 2, the United Kingdom, where it appears, is shown first in the division *Commonwealth* followed by other Commonwealth countries in alphabetical sequence. Foreign countries are also arranged alphabetically in the division *Foreign*. In all tables, countries have been assigned to the division appropriate in 1962–63.

The Republic of Ireland, although not a member of the Commonwealth, is classified for the purpose of trade statistics to *Commonwealth* countries because it is accorded British Preferential Tariff treatment (subject to compliance with preference conditions).

The names of countries appearing in the tables are those which applied in 1962–63.

Details shown for each country relate to trade with the country as designated except for the following variations :

The figures shown against :

(a) Aden for 1963–64 and 1964–65 relate to the country designation South Arabia ;

(b) Federation of Malaya for 1964–65 relate to trade with Malaysia which comprised the former Federation of Malaya, Sabah, Sarawak and Singapore ;

(c) Rhodesia and Nyasaland for 1964–65 relate to trade with Malawi, Southern Rhodesia and Zambia ;

(d) Tanganyika for 1964-65 relate to trade with the United Republic of Tanganyika and Zanzibar.

The Christmas Island referred to in this publication is the Australian territory situated in the Indian Ocean.

Supplementary details of countries included in the designation " Other Countries " of Tables 1 (Imports) and 2 (Exports) are shown in the appendix following each of these tables.

Ships' Stores

The term *Ships' Stores* comprises stores loaded on board ships and aircraft and includes bunker coal and oil. The value of ships' stores is included in Tables 7, 8, 10, 11 and 12 but is excluded from Tables 2 and 9. In Table 3, a dissection of ships' stores according to commodity is given for the years 1962–63 to 1964–65. Where the value of oversea ships' stores is less than $100 on any one entry, the stores concerned are not classified according to commodity, but are included in Table 3 under the item *Other Ships' Stores.*

Reimports

Goods classified as *Reimports* consist of articles exported from Australia and subsequently reimported into Western Australia.

Abbreviations

n.e.i. denotes *not elsewhere included.*

Germany, Fed. Rep. of refers to the Federal Republic of Germany.

South Africa, Rep. of refers to the Republic of South Africa.

U.S.S.R. refers to the Union of Soviet Socialist Republics.

SECTION 2—TRANSPORT

SHIPPING

Movement of Vessels

On arrival at, or departure from, a port in Australia, whether from or for an oversea country or from or for another port in Australia, the master or agent must " enter " the vessel with the Customs authorities at the port, and supply certain prescribed information in regard to the ship and its cargo. At the end of each month the Department of Customs and Excise sends to the Commonwealth Bureau of Census and Statistics a return of information so obtained. Particulars in this publication which relate to movements of vessels have been prepared from shipping tabulations compiled from these returns. The returns relate mainly to vessels engaged in the transport of passengers and/or cargo between Australian States or between Australia and oversea countries.

In reading the tables relating to *Shipping* the following points should be borne in mind. In Tables 17–21, movements of vessels between one Western Australian port and another are not included. Tables 17 and 18 do not therefore record total activity at each port. The figures published in Tables 22 and 23 do, however, represent total activity, since intrastate movements are included.

Country or *State* " from which entered " refers to the oversea country or Australian State in which loading of cargo for the voyage commenced. *Country* or *State* " to which cleared " refers to the oversea country or Australian State in which the discharge of cargo is to be completed. In the case of a vessel without cargo (*i.e.*, " in ballast ") voyaging to or from Australia (or between Australian States) the country or State referred to is that in which the voyage commenced or terminated.

The *gross tonnage* and *net tonnage* of a vessel are measures of its carrying capacity, one ton being equal to 100 cubic feet. The gross tonnage, as used in Tables 26–28, represents the total volume of a vessel's enclosed space. The net tonnage, as used in all other tables, represents the volume of enclosed space that can be used for cargo and passengers.

Tonnage of Cargo

Most cargoes are recorded in terms of the *ton weight* of 2,240 lb., but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the *ton measurement*, a unit equivalent to 40 cubic feet of space.

Information relating to oversea and interstate cargoes as shown in Table 24 has been derived from the statistical returns furnished by the Department of Customs and Excise. Particulars of intrastate cargo are obtained from the Fremantle Port Authority, the Albany Harbour Board, the Bunbury Harbour Board and the Harbour and Light Department.

The information in Table 24 has been compiled from tonnages as recorded on ships' manifests, and cargo is shown separately in *tons weight* and *tons measurement*. In Tables 25–28, which have been prepared from particulars supplied by the several port authorities, such details are not shown separately.

The tonnages appearing in Tables 25–28 cannot be reconciled with those shown in Table 24 because a port authority, for the purpose of calculating cargo handling charges, may classify items of cargo, as between *tons weight* and *tons measurement*, in a manner different from that shown on the ship's manifest.

Sources of Statistics

Railways—

The Western Australian Government Railways Commission.
The Midland Railway Company of Western Australia Limited.
Proprietors of timber railways.

OTHER TRANSPORT—*continued*

Omnibus Services—

Metropolitan (Perth) Passenger Transport Trust.

The Western Australian Government Railways Commission.

The Eastern Goldfields Transport Board.

Proprietors of privately-owned omnibus services.

Ferry Service—

Metropolitan (Perth) Passenger Transport Trust.

Motor Vehicle Registrations—

In Western Australia there is no single authority responsible for the licensing of motor vehicles. The Traffic Branch of the Police Department issues licences in the Metropolitan Traffic Area, which (at the 30th June, 1965) comprised the whole of the Metropolitan Statistical Division and that part of the Swan Division consisting of the Shires of Cockburn, Gosnells, Kwinana and Rockingham in their entirety and parts of the Shires of Armadale-Kelmscott, Mundaring and Swan-Guildford. Outside the Metropolitan Traffic Area each Town Council or Shire Council is responsible for the licensing of vehicles in its own district. Statistics are compiled from the records of each licensing authority.

The Traffic Act provides for the registration of motor vehicles throughout the State, but those owned by the Commonwealth Government are not required to be licensed under the Act. Particulars of Commonwealth Government-owned vehicles (excluding those of the defence services) listed with the Commonwealth Registry, Canberra are shown in footnote (*f*) to Table 45.

(*a*) See letterpress on page 290. (*b*) Most cargoes are recorded in terms of the ton weight of 2,240 lb., but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the ton measurement, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of " tons weight " or " tons measurement."

(*a*) See letterpress on page 290. (*b*) Most cargoes are recorded in terms of the ton weight of 2,240 lb., but some cargo, consisting mainly of bulky commodities, is recorded on the basis of the ton measurement, a unit equivalent to 40 cubic feet of space. Statistics are compiled accordingly in terms of " tons weight " or " tons measurement."

Cargo Discharged and Shipped at Ports : 1964-65

The figures in this table which relate to oversea and interstate cargoes have been compiled from returns furnished to the Department of Customs and Excise, while those which relate to intrastate cargo have been obtained from the several port authorities (*a*).

(a) Includes timber railways used by mining companies. Figures for 1961–62 and later include particulars of four lines which, prior to 1st July, 1961, were operated by the State Government in connexion with the sawmill activities of State Building Supplies and Western Australian Government Railways. These lines passed to private ownership on 1st July, 1961. (b) At 30th June.

PRIVATE RAILWAY : MIDLAND-WALKAWAY

NOTE : The railway between Midland and Walkaway formerly operated by The Midland Railway Company of Western Australia Limited became part of the Western Australian Government Railways system on 1st August, 1964, its purchase by the State Government having been authorized by The Midland Railway Company of Western Australia Limited Acquisition Agreement Act, 1963. Details shown for 1963-64 in Tables 39-41 relate to the period 1st July, 1963 to 31st July, 1964.

(*a*) Excludes tourist services and school bus services. Includes trolley-bus services. (*b*) Eastern Goldfields Transport Board figures relate to appropriations for renewal of assets. (*c*) Year ended 30th November. (*d*) Not available. (*e*) Figures for years 1955–56 to 1957–58 relate solely to omnibus services conducted by the former Western Australian Government Tramways and Ferries Department and Fremantle Municipal Transport Board. Those for 1960–61 and later relate wholly to operations of the Metropolitan (Perth) Passenger Transport Trust. The Metropolitan (Perth) Passenger Transport Trust, constituted under the Metropolitan (Perth) Passenger Transport Trust Act, 1957–1961, commenced services on 1st September, 1958 after the acquisition of two privately-owned omnibus services. The Trust assumed control of the services operated by the Western Australian Government Tramways and Ferries Department on 1st July, 1960 and the service of the Fremantle Municipal Transport Board on 1st September, 1960. The Trust's programme of acquisition of all major metropolitan road passenger transport services was completed on 29th April, 1962. (*f*) See note (*e*) concerning acquisitions by the Metropolitan (Perth) Passenger Transport Trust. * Revised.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound	=	2 dollars ($2)
1 shilling	=	10 cents (10c)
1 penny	=	$\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equivalent in value to eight shillings sterling or $US 1.12.

NOTES ON STATISTICS OF AGRICULTURE AND LIVESTOCK

SOURCES OF INFORMATION

1. The statistics relating to agriculture and livestock, as published in this Part of the Statistical Register, are, in the main, compiled from statutory returns supplied annually at the 31st March by occupiers of rural holdings in Western Australia.

2. Additional information is obtained from entirely separate collections covering slaughtering and bee keeping and from various authorities.

PERIOD COVERED

1. Data relating to area sown, production, yield per acre and number of holdings growing crops are, in general, for the season ended 31st March. In cases where harvesting has not been completed by 31st March (*e.g.* potatoes, apples, pears) total production, including quantities harvested after the 31st March, is recorded. A seasonal calendar showing approximate times of sowing or planting, harvesting, lambing and shearing appears on page 8 of this Part.

2. Livestock numbers are as at the 31st March and livestock products are, in general, for the year ended 31st March. Slaughterings are for the year ended 30th June.

3. Statistics of bee keeping relate to hives and production for the year ended 30th June.

4. Particulars of farm machinery are as at the 31st March.

DEFINITIONS AND EXPLANATORY NOTES

1. **Rural Holdings**—For statistical purposes a " rural holding " is defined as a piece of land of one acre or more in extent, used for the production of agricultural products (including fruit and vegetables, nursery plants, etc.) or for the raising of livestock (including poultry) and the production of livestock products. Holdings of less than one acre on which commercial market gardens, nurseries, poultry farms or hatcheries are operated are also included.

An occupier who works more than one holding is generally required to supply a separate annual return for each holding, particularly if the holdings are situated in different local government areas. If, however, the holdings are not far apart and are worked as one, the occupier may (and in most instances does) supply a single composite return covering the holdings concerned. The holdings covered by a composite return are treated, for statistical purposes, as forming a single rural holding. Where a holding extends into two or more local government areas, the holding and all operations on it are attributed to the local government area in which the homestead is located.

2. **Area of Crops**—The total area of land sown or planted to crops is shown irrespective of whether the whole area was harvested or whether a portion or the whole of the crop failed and was not harvested. In the case of fruit and vegetables, only commercial areas are included.

Where two successive crops are grown on the same land during one season, the land is included twice in area of crops except in Tables 3 and 4 where it is counted once only in " Cleared Land Used for Crop."

No data on the area planted to individual types of orchard fruits are collected but estimates, based on the reported total orchard acreage and the number of trees of each variety planted, are made and are published in this Part.

3. **Yield per Acre**—Figures published in this Part relate to yield per acre sown or planted. Acreages of crops harvested are not recorded and consequently particulars of yields per acre harvested are not available. In the case of apples, pears and oranges yields are shown in terms of " per acre of bearing trees."

4. **Population of Rural Holdings**—Persons of all ages residing on rural holdings at the 31st March are recorded, including those temporarily absent but excluding guests and visitors.

5. **Employment on Rural Holdings**—Details are collected in the general farm census of persons working on rural holdings at the 31st March. Persons working permanently full-time exclude casual or seasonal workers, females engaged principally in domestic duties, children attending school and other persons who work only part-time.

Attention is drawn to the difficulty encountered in compiling data on a comparable basis, from year to year, of persons employed. The difficulty applies particularly to females and arises because of the tendency of many farmers to include part-time family helpers in their returns as full-time workers. It is necessary in compiling the returns to exclude a considerable number of these workers and, while all possible care is taken in doing this, it is difficult to ensure that the treatment is consistent from year to year. For this reason no information on female employment is published in this Part.

6. **Livestock Slaughtered**—Monthly returns are collected from principal slaughterers (abattoirs, meat works and bacon factories) and these, together with annual returns from all other slaughterers (a special return from country butchers and the general census return from farmers and pastoralists) provide the necessary data for compiling estimates of all livestock slaughtered.

7. **Cattle**—Following an investigation into the adequacy of the wording and arrangement of the cattle sections of the forms used in collecting agricultural and pastoral statistics, certain changes have been made in the classification of cattle as at the 31st March in 1964 and later years.

Prior to 1964, informants were asked to classify their stock as either " beef cattle " or " dairy cattle ". These two terms tended to cause confusion between breed and purpose. For example, in cases where vealer production was carried on in association with dairying the informant was in doubt as to how to classify part or all of the herd. From 1964, informants have been asked to classify cattle according to the two main purposes of " meat production " and " milk production ", irrespective of breed, and to report separately the numbers of cows and heifers kept for their own domestic milk supply. Consequently, detailed statistics of cattle for 1964 and later are not comparable with those for earlier years.

Table 31 shows the numbers of cattle for meat production kept on rural holdings in local government areas at the 31st March, 1965 and, for the same date, the numbers kept for milk production. Cattle numbers for each of the ten years to 31st March, 1965, are given in Table 30.

8. **Bee Keeping**—In compiling bee-keeping statistics from 1957–58, returns have been collected only from apiarists with five or more hives whereas in previous years all apiarists were included. As bee keepers with less than five hives account for a very small proportion of the total number of hives and of production, comparability with previous years is not materially affected.

9. **Bushel Weights**—The production of cereals, fruit and certain other commodities is generally recorded in bushels. While the weight of a bushel varies according to the nature of the product, it is also subject to considerable variation on account of such factors as method of packing and size and variety within each kind of product. The average bushel equivalent weights set out below may be used to convert production to pounds weight avoirdupois.

STATISTICAL DIVISIONS AND LOCAL GOVERNMENT AREAS

1. From 1929–30 Western Australian statistics of agriculture and livestock have been tabulated according to Local Government Areas. In this Part in the tables where information for separate Local Government Areas is published, the district designations and names used are those which were current at the 31st March, 1965.

Changes in names and designations which occurred during 1964–65 are shown on page 7.

The Town of Carnarvon was amalgamated with the Shire of Gascoyne-Minilya to form the Shire of Carnarvon, with effect from the 1st March, 1965.

The Town of York was amalgamated with the Shire of York, with effect from the 15th March, 1965, to form one Local Government Area named the Shire of York.

The name of the Shire of Geraldton-Greenough was changed to the Shire of Greenough, with effect from the 19th March, 1965.

A change of name which occurred after the 31st March, 1965, and has therefore not been taken into account, is as follows:—

The name of the Shire of Trayning-Kununoppin-Yelbeni was changed to the Shire of Trayning, with effect from the 10th September, 1965.

2. Local Government Areas of the State are grouped into eleven Statistical Divisions and a table showing the Cities, Towns and Shires comprising these Divisions at the 31st December, 1964 is shown on page 112 and a list of Local Government Areas at the same date is given on page 113. A map showing the boundaries of Statistical Divisions and Local Government Areas is attached inside the back cover.

3. Data relating to agriculture and livestock in Towns outside the Metropolitan Statistical Division are combined with those for the surrounding or adjacent Shire (except in the case of the Town of Bunbury, for which separate figures are shown). Thus particulars for the Towns of Albany, Narrogin and Northam are included with those for the Shires of the same name, those for the Town of Geraldton with the Shire of Greenough, and for the Towns of Kalgoorlie and Boulder with the Shire of Kalgoorlie. Separate statistics of agriculture and livestock are not compiled for the individual Local Government Areas of the Metropolitan Statistical Division.

4. The areas of local government districts at the 30th June, 1965 are shown in Table 3 on pages 10 to 13. Official estimates of areas, usually shown in square miles, have been converted to acres for comparison with the statistics of rural land utilization which are shown in the Table. Transfers of land between districts during the year ended 30th June, 1965, taken into account in calculating the areas shown, are listed below. Transfers affecting farms and stations which took place prior to the 31st March, 1965 have been taken into account in compiling the district data published in this Part.

TYPE AND SIZE CLASSIFICATION OF RURAL HOLDINGS, SEASON 1959–60

Special tabulations relating to the classification of rural holdings by type of farming activity and size of principal activities are published in a bulletin, issued by the Commonwealth Statistician, which is available for reference at the Office of the Deputy Commonwealth Statistician for Western Australia.

SEASONAL CALENDAR

The following calendar is intended to show the main periods when principal agricultural and pastoral activities are carried out in Western Australia. Operations are generally confined to the periods shown but are subject to variation according to such factors as geographical location within the State, the variety of seed sown (or trees and vines planted) and exceptional seasonal conditions.

(*a*) Comprises Shire and Town. (*b*) Drop in 1962–63 figures mainly due to transfer of area to Coorow; see note (*c*). (*c*) The Shire of Coorow was constituted, with effect from the 1st July, 1962, by severance of territory from the Shires of Carnamah, Dalwallinu and Perenjori. (*d*) Comprises Shire of Greenough and Town of Geraldton. * Revised.

SECTION 8—VALUE OF PRODUCTION

I. PRIMARY PRODUCTION

(*a*) *Gross Value* is the value placed on recorded production at the wholesale price realized at the principal market. In cases where primary products are consumed at the place of production or where they become raw material for a secondary industry, these points of consumption are taken as the principal markets.

(*b*) *Marketing Costs* comprise freight, cost of containers, commission, and other charges incurred in marketing.

(*c*) *Local Value* is the value recorded at the place of production, and is obtained by deducting *Marketing Costs* from *Gross Value*.

(*d*) *Cost of Goods Consumed in the Process of Production* covers seed and fertilizers used, pickling, sprays, dips, fodder consumed, fuel and oil, and other selected costs of a similar nature.

(*e*) *Net Value* represents the return to the producer (farmer, pastoralist, mine owner, etc.) and is the sum available for payment of wages, interest, rent, depreciation, other overhead costs, and for the producer's own income. It is obtained by deducting from *Local Value* the *Cost of Goods Consumed in the Process of Production.*

Gross and *Local Values* of primary production involve some duplication as they include the products of certain primary industries which are consumed as raw materials by other industries in the group (*e.g.*, hay consumed by livestock). Furthermore, many of the materials consumed by primary industries are the products of secondary industry. However, duplication has been eliminated in calculating the *Net Value* of primary production by deducting the cost of both primary and secondary products consumed by primary industries. Therefore, *Net Value* of primary production should be used when comparing or combining values for primary industries with those for secondary industries.

II. MANUFACTURING

(*a*) *Value of Output* is the selling value "at the factory" (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

(*b*) *Cost of Goods Consumed in the Process of Production* covers materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and materials used for packing.

(*c*) *Net Value of Production* is the value added in the course of manufacture and is the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit. It is obtained by deducting from the *Value of Output* the *Cost of Goods Consumed in the Process of Production.*

In the process of manufacture, the output of one factory may become the raw material of another and aggregations of values of factory output therefore involve considerable duplication. However, in arriving at *Net Value* of production, *i.e.*, value added by the process of manufacture, no duplication occurs as the value added by each factory is taken into account once only. Because of this, and as much of the output of primary industry becomes raw material of secondary industries, *Net Value* of factory production (as defined above) should be used when comparing or combining values for secondary industries with those for primary industries.

Separate State figures are not available for distributions made from 1956–57 to 1958–59, when payments were virtually complete. (*b*) The value of sheep slaughtered shown in Table 52 above has been computed from prices " on hoof " at principal markets and therefore includes a value for wool on skins. Values of fellmongered wool and wool exported on skins have been estimated separately to arrive at a gross value for total wool production.

No. 57—Monthly Average Prices of Fruit: Metropolitan Markets, 1967
($)

Note—The average prices shown in this table have been computed from a systematic sample of auctioneers' records of fruit sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month outside its recognized season does not reach a significant proportion of sales for the year, a price has not been shown. In computing the annual averages, however, all sales have been included.

Commodity	Unit	January	February	March	April	May	June	July	August	September	October	November	December	Annual Average

No. 58—Monthly Average Prices of Vegetables: Metropolitan Markets, 1965

($)

Note—The average prices shown in this table have been computed from a systematic sample of auctioneers' records of vegetables sold on the auction floor at each sale conducted at the Metropolitan Markets. Where the volume of sales of a particular commodity in any month outside its recognized season does not reach a significant proportion of sales for the year, a price has not been shown. In computing the annual averages, however, all sales have been included.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound = 2 dollars ($2)
1 shilling = 10 cents (10c)
1 penny = $\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equivalent in value to eight shillings sterling or $US 1.12.

EXPLANATORY NOTES AND DEFINITIONS

Definition of Factory—For statistical purposes a factory is defined as any establishment which is engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year, or power other than manual is used.

Classification—In the case of a factory which engages in more than one industry on the same site a separate return is obtained, where possible, for each industry. Each of these components is then classified as if it were a separate factory. However, where it is not practicable for the manufacturer to submit separate returns, the factory is classified to the predominant activity, *e.g.*, a factory *principally* engaged in manufacturing Ice but also producing Aerated Waters and Cordials would be classified to Ice and Refrigeration if separate returns were not available.

Confidential Information—The Acts under which these statistics are collected require that information supplied on any individual return must be treated as confidential. For this reason it has not been possible to publish some items and in other cases it has been necessary to combine details for publication. As these confidential provisions apply throughout Australia, separate details have been withheld in some instances in order to prevent disclosure of confidential information in respect of individual States. The tables affected carry appropriate footnotes.

Employment—Figures relate to the factory proper and exclude persons engaged in obtaining raw materials (*e.g.*, persons employed by sawmills in felling and hauling logs) and persons engaged in selling or distribution. Working proprietors are included unless otherwise stated.

Average employment figures may be expressed as an average " over the period worked " or as an average " over the whole year." Thus a factory which operates for only six months of the year and employs 20 persons throughout that period has an average employment of 20 " over the period worked," but an average of only 10 " over the whole year." The type of average is indicated in each table.

Value of Output—The value of output is the selling value " at the factory " (*i.e.*, the value at the point of sale *less* all selling and distribution costs) of all goods made or processed during the year and includes the amount received for other work done, such as repair work, assembling and making-up for customers. Any bounty or subsidy received on finished products is included.

Net Production—" Net Production " is the value added in the course of manufacture and is the sum available for payment of wages, rent, depreciation, other sundry expenses and for interest and profit. It is obtained by deducting from the value of output the cost of goods consumed in the process of production. The costs deducted are those of materials used, fuel, power and light, lubricating oil and water, repairs to plant and buildings, tools replaced, and containers and materials used for packing.

In the process of manufacture, the output of one factory may become the raw material of another and aggregations of values of factory output therefore involve considerable duplication. However, in arriving at Value of " Net Production," *i.e.*, value added by the process of manufacture, no duplication occurs as the value added by each factory is taken into account once only.

Land and Buildings, Plant and Machinery—Values shown represent depreciated or book values at end of each period and include estimated values in cases where premises and plant and machinery are rented by the occupier.

Local Government Areas—The district designations and names used are those which were current at the 30th June, 1965.

Changes in names and designations which occurred during 1964–65 are shown below.

The Town of Carnarvon was amalgamated with the Shire of Gascoyne-Minilya to form the Shire of Carnarvon, with effect from the 1st March, 1965.

The Town of York was amalgamated with the Shire of York, with effect from the 15th March, 1965, to form one Local Government Area named the Shire of York.

The name of the Shire of Geraldton-Greenough was changed to the Shire of Greenough, with effect from the 19th March, 1965.

A change of name which occurred after the 30th June, 1965, and has therefore not been taken into account is as follows :

The name of the Shire of Trayning-Kununoppin-Yelbeni was changed to the Shire of Trayning, with effect from the 10th September, 1965.

Statistical Divisions—A map showing Statistical Divisions and their component Local Government Areas appears in Part V of the Statistical Register of Western Australia.

Rounding of Figures—Monetary amounts appearing in Tables 57–58 and 61–63 have been rounded to thousands of dollars without making those adjustments which would be needed to make the rounded figures add to the rounded total. It is for this reason that figures do not always add to the totals shown in the tables.

(*a*) Excludes Working Proprietors. (*b*) It should be noted that there is a break in the continuity of the index-number series between June and July, 1935, owing to the inclusion, from July, 1935 onwards, of certain factories previously not included. This tends to exaggerate the degree of recovery.

(*a*) Cities are marked (C), Towns (T) ; all other Local Government Areas are Shires. The names of Local Government Areas used in this table are those which were effective at the 30th June, 1965. A map showing Local Government Areas and Statistical Divisions is published in Part V of the Statistical Register. (*b*) See " Explanatory Notes and Definitions " on page 4. (*c*) Average over whole year. (*d*) Excludes amounts drawn by working proprietors. (*e*) The South Ward and Guildford Ward of the Shire of Swan-Guildford are situated in the Metropolitan Statistical Division, the remainder being in the Swan Statistical Division. The particulars shown for the Shire of Swan-Guildford relate to the whole of the Shire but the figures for the South Ward and Guildford Ward are included in the totals for the Metropolitan Statistical Division and are excluded from the totals for the Swan Statistical Division. ‡ Not available for publication.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound	=	2 dollars ($2)
1 shilling	=	10 cents (10c)
1 penny	=	$\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equivalent in value to eight shillings sterling or $US 1.12.

(*a*) Comprises gold refined at the Mint and gold contained in gold-bearing materials exported. Figures for individual years do not agree with mine production, quoted in Tables 1, 3, 4 and 5, because of the delay between production at the mine and refining at the Mint. (*b*) Figures do not in all cases add to the totals shown owing to rounding to the nearest fine ounce. (*c*) Comprises gold in ores and concentrates exported.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :

1 pound = 2 dollars ($2)
1 shilling = 10 cents (10c)
1 penny = $\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equivalent in value to eight shillings sterling or $US 1.12.

NOTES

(i) *Local Government Legislation*—The Local Government Act of 1960 repealed the Municipal Corporations Act, 1906 and the Road Districts Act, 1919. Under the provisions of the repealed legislation, the financial year for Municipalities (now Cities and Towns in terms of the 1960 Act) ended on the 31st October, and for Road Boards (now Shires) on the 30th June. The Local Government Act prescribes a financial year ending on the 30th June for *all* local government authorities. The Act came into operation on the 1st July, 1961, and the financial statistics for 1961–62 presented in Tables Nos. 9–11 therefore refer to the period of eight months ended 30th June, 1962 in the case of Cities and Towns and to the year ended 30th June, 1962 in the case of Shires.

An outline of the main financial and procedural changes resulting from the operation of the Local Government Act is given in the issue of Part XI—*Local Government* for 1961–62. A general description of the Local Government system appears in Chapter III—*Constitution and Government* of the *Official Year Book of Western Australia, No.* 3 and later issues.

(ii) *Vermin Boards, Water Boards and Local Boards of Health*—The Local Government Act prescribes a single General Rate in place of the several rates formerly levied for specific purposes, and the financial transactions of Vermin Boards (with some exceptions) and Local Boards of Health are now included in the composite Annual Statement of Receipts and Payments of the local government authority concerned. Nevertheless, it has been found administratively expedient for a small number of Vermin Boards and Water Boards to remain financially independent. Statistics relating to these Boards are presented separately in Table No. 8. The figures appearing in Tables Nos. 9–11 include the transactions of Vermin Boards and Water Boards and, prior to 1961–62, Local Boards of Health.

For detailed statistics of water supply, sewerage and drainage, the reader is referred to Part VII—*Mineral Statistics and Water Conservation* of the *Statistical Register* and to the Annual Reports of the Metropolitan Water Supply, Sewerage, and Drainage Board and the Department of Public Works and Water Supply.

(iii) *Eastern Goldfields Transport Board*—The Eastern Goldfields Transport Board operates an omnibus service in the Kalgoorlie-Boulder urban area, under an agreement with the Kalgoorlie and Boulder Town Councils and the Kalgoorlie Shire Council. Its financial transactions are not included in the figures shown in Tables Nos. 9–11 but are summarized in Table No. 14.

(iv) *Statistical Divisions*—The Statistical Divisions referred to in this publication are shown, together with their component local government areas, on a map appearing in Part V of the *Statistical Register of Western Australia*, the *Abstract of Statistics of Local Government Areas* and the *Western Australian Year Book*.

The Statistical Divisions comprise, with two exceptions, groups of complete and contiguous local government areas. The exceptions are the Metropolitan Statistical Division and the Swan Statistical Division. The Metropolitan Statistical Division includes the South Ward and the Guildford Ward of the Shire of Swan-Guildford, the remainder of the Shire being in the Swan Statistical Division. Particulars for these two parts of the Shire are not available separately, apart from those relating to area, population and dwellings which are shown in Table No. 1. All other statistics relate to the whole Shire and are included in the figures for the Swan Statistical Division.

In Tables Nos. 1–6, local government areas have been arranged alphabetically within each Statistical Division. To facilitate reference to the tables, an index list of local government areas as at the 30th June, 1965 is provided on page 39.

(v) *Changes in Local Government Areas*—

Changes in names and designations which occurred during 1964–65 are shown below.

The Town of Carnarvon was amalgamated with the Shire of Gascoyne-Minilya to form the Shire of Carnarvon, with effect from the 1st March, 1965.

The Town of York was amalgamated with the Shire of York, with effect from the 15th March, 1965, to form one Local Government Area named the Shire of York.

The name of the Shire of Geraldton-Greenough was changed to the Shire of Greenough, with effect from the 19th March, 1965.

A change of name which occurred after the 30th June, 1965 and has therefore not been taken into account, is as follows :

The name of the Shire of Trayning-Kununoppin-Yelbeni was changed to the Shire of Trayning, with effect from the 10th September, 1965.

n.a. denotes "not available".

(*a*) Figures exclude full-blood Aborigines and dwellings occupied solely by them. A " dwelling " is any habitation occupied, or for occupation, by a household group living together as a domestic unit whether comprising the whole or only part of a building. The term has, therefore, a very wide reference and includes, in addition to houses and flats, a great variety of " dwellings " ranging from a single-roomed shack to a multi-roomed hotel, institution, staff barracks, quarters, etc. (*b*) The numbers shown for unoccupied dwellings do not represent vacant houses or flats available for sale or renting. They include week-end and holiday homes, seasonal workers' quarters and other dwellings which were not occupied on the night of the Census, as well as newly-completed dwellings whose owners or tenants had not entered into occupation. (*c*) Excludes full-blood Aborigines. (*d*) Includes unoccupied dwellings ; see also note (*b*). (*e*) Includes 5 miles, 33 chains of concrete surface. (*f*) Includes limestone and granite. (*g*) Comprises roads mainly of natural surfaces, formed but not metalled or otherwise prepared. (*h*) Unprepared except for certain clearing. (*i*) The Town of North Fremantle was annexed to the City of Fremantle with effect from the 1st November, 1961. The figures shown for the Census of 30th June ,1961 are on the basis of the extended boundary. (*j*) See note (iv) on page 3. (*k*) For particulars of area, population and dwellings see page 4. See also note (iv) on page 3. (*l*) The Town of York was amalgamated with the Shire of York with effect from the 15th March, 1965 to form one Local Government Authority named the Shire of York. The figures shown for the Census of 30th June, 1961 are on the basis of the extended boundary. (*m*) The Shire of Coorow was constituted, with effect from the 1st July, 1962, by severance of territory from the Shires of Carnamah, Dalwallinu and Perenjori ; and the Shire of Exmouth, with effect from the 1st January, 1964, by severance of territory from the Shire of Gascoyne-Minilya (now part of Shire of Carnarvon). In the case of each of the Shires involved in these changes, the particulars shown for the 30th June, 1961 relate to the area as adjusted and have been derived from an examination of the Census schedules. (*n*) Name of Shire changed from Geraldton-Greenough to Greenough with effect from 19th March, 1965. (*o*) The Town of Carnarvon was amalgamated with the Shire of Gascoyne-Minilya to form the Shire of Carnarvon, with effect from the 1st March, 1965. The figures shown for the Census of 30th June, 1961 are on the basis of the extended boundary. See also note (*m*). (*p*) Commissioner appointed under Section 31 of the Local Government Act. (*q*) Includes " migratory " population. The migratory population comprises persons (both passengers and crew) *not enumerated elsewhere* who spent Census night on ships or were travelling on long-distance trains, motor coaches or aircraft. (*r*) Represents population at the Census of the 30th June, 1961 plus natural increase and recorded net migration since that date ; total only has been amended in accordance with the preliminary results of the 1966 Census. Includes migratory population ; see also note (*q*). (†) Particulars are incomplete as information for some Shires is not available.

(*a*) For 1965 comprises three Extinguisher Servicing Tankers, two Turntable Extension Ladders and two Trailer Pump Units. (*b*) Excludes Special Service Calls which in 1965 numbered 46. (*c*) The Fire Brigades Act provides that the ordinary expenditure of the Western Australian Fire Brigades Board shall be borne in statutory proportions by insurance companies, local government authorities and the Government of Western Australia. Prior to the operation of an amendment made to the Act in 1963, these proportions were 5/9ths, 2/9ths and 2/9ths respectively. Under the provisions of the amending Act, contributions during the three-year period ending 30th September, 1967 are to be made in the proportions of 64 per cent., 20 per cent. and 16 per cent. (*d*) From 1st October, 1962 fires involving light poles, fencing, etc., which were previously classified as *Major* fires, have been included under the heading *Chimney, Grass and Rubbish*. * Revised.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound	=	2 dollars ($2)
1 shilling	=	10 cents (10c)
1 penny	=	$\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equivalent in value to eight shillings sterling or $US 1.12.

PART XII—RETAIL PRICES, WAGES, EMPLOYMENT AND MISCELLANEOUS

SECTION 1—RETAIL PRICES

Prices of a limited range of commodities are recorded in the Blue Books of Western Australia from the early years of settlement. It was not until 1911, however, that a systematic collection of retail prices statistics, undertaken by the Commonwealth Statistician, was begun. The results of this inquiry were published in 1912 and thus, for the first time, particulars of retail prices in a selection of Western Australian towns became available. As well as providing data for each of five principal towns for the year 1911, the published information contained particulars for the capital city for each year from 1901 to 1910, the scope of the investigation having been specially extended for this purpose. The 46 commodities included in the collection, in addition to house rent, comprised a representative range of groceries, dairy produce and meat. The field of collection was later expanded to cover other groups of household expenditure.

Prices are now collected regularly for items of food ; clothing and drapery ; housing ; household supplies and equipment ; and miscellaneous commodities and services.

Representative and reputable retailers and service establishments are selected for each class of commodity and each service. These informants furnish regular returns of prices. Whenever necessary, particulars of prices are also obtained from other firms. For food items, prices are collected monthly, as at the 15th of each month, and are averaged for the three months of the quarter. For most other items prices are obtained quarterly as at the 15th of the middle month of the quarter. In general, prices are collected from actual vendors at retail selling outlets. The prices are those actually being charged for normal cash purchases of new articles. " Bargain " or " sale " prices of imperfect goods or discontinued lines are not used.

The information is collected, under authority of the Census and Statistics Act 1905–1949, for specified " standards " of the commodities and services priced. Specifications include the unit of quantity to be priced, the grade, quality, size, style, etc., and in some cases the particular brand and the manufacturer's " line " number. The standards selected are those with a considerable volume of sales and likely to remain representative over a long period.

The items and standards priced are revised from time to time to keep them in harmony with changing conditions. Before each quarterly collection the standards of all items are reviewed after extensive inquiries among manufacturers, wholesalers and retailers. Where changes in the items or standards priced become necessary, suitable adjustments are made in compiling price series to ensure that they reflect only changes in prices for representative goods of constant quality and not differences in prices of differing standards.

The actual collection of information is carried out by specially qualified field officers of the Commonwealth Bureau of Census and Statistics, who not only receive and check returns but visit the shops or other establishments concerned.

Table No. 9 on page 13 shows the average retail prices in the metropolitan area of 38 items of food and groceries during each month of 1965.

RETAIL PRICE INDEX NUMBERS

The collected information relating to prices of goods and services may be summarized in the form of index numbers. Prices of items, selected as being representative of a high proportion of the expenditure of wage-earner households, are combined at regular intervals by the use of " weights " in approximate proportion to quantities actually used. The aim is to express as a single number the degree of change in prices for the selected field taken as a whole. In practice the application of this principle over a term of years presents great difficulty by reason of the numerous changes which occur in the type, grade and relative quantities of many of the items commonly used.

Basically, in the simplest method of compiling retail price indexes the price of each item is multiplied by a fixed quantity or " weight," the product being an " expenditure." The sum of these products for all items at any given date represents an " aggregate expenditure." The " aggregate expenditures " for successive periods are converted into an index series by equating the aggregate for a selected or " base " period to 100 (or some other convenient number), and calculating all index numbers to this base according to the ratio which the several aggregates bear to that of the base period.

The " A " Series Index was first compiled in 1912 and although it was both rudimentary and of limited scope, covering only food, groceries and house rents, it was not discontinued until 1938. The " C " Series Index was first compiled in 1921, and retrospectively to 1914, to supply the need for a more adequate index. It was originally described as the " All Items " Index, to distinguish it from the " A " Series, because it included, in addition to food, groceries and house rents, many items of clothing, household drapery and utensils, fuel, lighting, fares, smoking and some other miscellaneous items.

RETAIL PRICE INDEX NUMBERS—*continued*

The list of component items and the weighting pattern of the "C" Series Retail Price Index, first adopted in 1921, were slightly revised by Conference of Statisticians in 1936, but otherwise remained almost unchanged until the index was discontinued in 1960. From the outbreak of war in 1939 to late in 1948, periodic policy changes in regard to various war-time controls, including rationing, caused recurrent changes in consumption and in the pattern of expenditure. This rendered changes in the index desirable but made it impracticable either to produce a new index, or to revise the old one, on any basis that would render the index more representative than it already was of the changing pattern in those years.

When commodity rationing had virtually ceased in the latter part of 1948, action was taken by the Commonwealth Statistician to collect price data of about 100 additional items and to gather information as to current consumption and expenditure patterns. This was done to facilitate review of the component items and weighting system of the "C" Series Retail Price Index, in the light of the new pattern of wage-earner expenditure and consumption that appeared to be then emerging. However, there supervened, in the next few years, conditions which caused wide price dispersion coupled with a very rapid rise in prices and a new sequence of changes in consumption and the pattern of wage-earner expenditure. Under these conditions it was not possible to devise any new weighting pattern likely to be more continuously representative of conditions then current than was the existing "C" Series Index on the 1936 revision. A Conference of Statisticians considered the matter in June, 1953, and resolved, in part, as follows :—

"(a) That, in view of the persistence of recurrent changes in the pattern of consumer expenditure in the post-war period, it is undesirable to make a general revision of the list of items and weighting system of the "C" Series Retail Price Index at present, unless industrial tribunals expressly desire some revision for special purposes.

(b) That an Interim Retail Price Index be compiled with putative weights and components representative, as nearly as may be, of the post-war pattern of consumer usage and expenditure."

The "C" Series Index continued to be compiled on its pre-war basis without significant change in procedures. The Interim Retail Price Index, with the year 1952–53 as its base, was introduced in 1954 and continued until the March quarter of 1960. This Interim Index was a transitional index designed to measure retail price variations on the "C" Series model in terms of post-war consumption weights, as emerging in the early 1950's. It embraced a wider range of commodities and services than did the "C" Series Index, but it did not take into account successive major changes in the pattern of expenditure and modes of living that began to occur early in 1950 and through to 1960. These changes could not, in fact, be detected and measured promptly, and incorporated into an index, concurrently with their happening in those years. Nor was it envisaged as desirable to adopt fundamentally new procedures in price index construction until it was fully evident that far-reaching procedural changes were necessary to meet the situation that had developed between about 1950 and 1960.

During this period home-owning largely replaced the renting of privately-owned houses, the numbers of government-owned rented houses increased appreciably, the use of the motor car greatly increased and partly replaced use of public transport, various items of electrical household equipment and television came into widespread use, household consumption of electricity greatly increased, and technological developments such as the introduction of new synthetic materials produced a number of changes in clothing and other groups of items. Through the impact of these continuing changes in usage, combined with disparate movements in prices, the Interim Retail Price Index became outmoded. As studies progressed and new data became available, it was clear that no single list of items and no single set of fixed weights would be adequately representative as a basis for measuring retail price changes at all times throughout the post-war period. In consequence, the situation was met by compiling the Consumer Price Index constructed as a chain of linked indexes with significant changes in composition and weighting effected at short intervals.

THE CONSUMER PRICE INDEX

The Consumer Price Index was first compiled in 1960, retrospectively to the September quarter of 1948. It replaced both the "C" Series Retail Price Index and the Interim Retail Price Index in official statistical publications. The title "Consumer Price Index" is used for purposes of convenience and does not imply that the new index differs in definition or purpose from previous retail price indexes. The Index is designed to measure quarterly variations in retail prices of goods and services representing a high proportion of the expenditure of wage-earner households. The weighting pattern relates to estimated aggregates of wage-earner household expenditure and not to estimated expenditures of an "average" or individual household of specified size, type, or mode of living. It is thus possible to give appropriate representation to owner-occupied houses as well as rented houses and to include motor cars, television sets, and other major expenditures which relate to some households and not to others.

Investigations revealed that the incidence and frequency of changes in the pattern of household expenditure since 1950 were such as to render it necessary to construct the index with additional items and changes in weighting patterns at intervals, rather than on the basis of a list of items and set of weights which remained unchanged throughout the period. Five series for short periods (September quarter, 1948 to June quarter, 1952; June quarter, 1952 to June quarter, 1956; June quarter, 1956 to March quarter, 1960 ; March quarter, 1960 to December quarter, 1963 ; and from December quarter, 1963) have therefore been constructed and linked to form a continuous series.

THE CONSUMER PRICE INDEX—*continued*

At times of linking the weighting pattern was altered and, in addition, new items (mainly those that had become significant in house-hold expenditure) were introduced. In each period between links the items and weighting have remained unchanged.

The Consumer Price Index covers a wide range of commodities and services arranged in the five major groups, Food ; Clothing and Drapery ; Housing ; Household Supplies and Equipment ; and Miscellaneous. It is designed only to measure the proportionate change in prices as combined in the individual groups, or the aggregate of the groups in the index. This is a basic principle of all price indexes, and failure to appreciate it gives rise to misconceptions concerning price indexes and their uses. Consumer (retail) price indexes are sometimes loosely called " cost of living indexes " and are thought to measure changes in the " cost of living." Neither the Consumer Price Index, nor any other retail price index, measures those changes in the cost of living that result directly from changes in the mode or level of living. Changes of that kind are matters for consideration apart from price indexes. But the change in prices of goods and services is a very important part of the change in any cost of living and this part is measured by consumer (retail) price indexes.

The following summary gives a general description of the nature of the items included in the several groups which together comprise the Consumer Price Index.

Food—Meat (fresh and processed) ; dairy produce : cereal products ; soft drink, ice cream and confectionery ; potatoes, onions and preserved fruit and vegetables ; and other foods including sugar, jam, margarine, tea, coffee, baby foods, and sundry canned and other foods.

Clothing and Drapery—Men's, women's, boys' and girls' clothing ; men's, women's and children's footwear ; household drapery ; and piecegoods and knitting wool.

Housing—Costs (house price, rates, repairs and maintenance) involved in home ownership or purchase by instalments ; and rent paid to a private owner or government authority.

Household Supplies and Equipment—Household appliances ; fuel and light ; and household articles including furniture (from December quarter, 1963), floor coverings, kitchen and other utensils, gardening and small tools, household sundries, personal requisites, proprietary medicines and school requisites.

Miscellaneous—Transport (train, tram and bus fares and private motoring costs) ; beer ; tobacco and cigarettes ; services such as hairdressing, dry cleaning, shoe repairs and postal and telephone services ; and other expenditure including costs of radio and television operation, cinema admission and newspapers.

These groups do not include every item of household spending. It is both impracticable and unnecessary for them to do so. Prices are collected regularly for specified quantities and qualities of a large and representative selection of commodities and services. Movements in the prices of these items, when combined in suitable proportions, provide a representative measure of price change as affecting a high proportion of the expenditure of wage-earner households.

The sets of weights used have been derived from analyses of statistics of production and consumption, the Population Censuses of 1947, 1954 and 1961, the Censuses of Retail Establishments of 1948–49, 1952–53, 1956–57 and 1961–62 and the continuing Survey of Retail Establishments ; from information supplied by manufacturing, commercial, and other relevant sources ; and from special surveys. As from the December quarter, 1963 the weights, in general, are based on the pattern of consumption of the years 1957–58 to 1961–62.

The index has been compiled for each quarter from the September quarter of 1948, and for each financial year from 1948–49. (Comprehensive series of Consumer Price Index numbers *ab initio* are given in Tables Nos. 1 to 7 of Part XII of the *Statistical Register* for 1959–60). " All Groups " index numbers, and group index numbers for each of the five major groups, are compiled and published regularly for the six State capital cities separately and combined. The reference base for *each* of these indexes is : Year 1952–53 = 100·0. Figures appearing after the decimal point possess little significance for general statistical purposes. They are inserted merely to avoid the minor distortions that would occur in rounding off the figures to the nearest whole number.

The separate city indexes measure price *movements* within each city individually. They enable comparisons to be drawn between cities as to differences in the degree of *price movement*, but not as to differences in the *actual price level* since the index for each city is independently based, on the prices recorded *in that city* during 1952–53. Similarly, the separate group indexes measure price movements of each group individually. They enable comparisons to be drawn as to differences in the degree of price change in the different groups, but do not show the comparative cost of the different groups.

The index for the six capital cities combined is a weighted average of price movement in the individual cities. The relative influence of the several cities on the combined index is determined by their populations at the 1954 Census for periods to the December quarter, 1963. From the link made as at the December quarter, 1963 the weights of the individual cities have been revised on the basis of the results of the 1961 Census.

The foregoing summary of the main features of the Consumer Price Index has been prepared from publications issued by the Commonwealth Statistician, Canberra, among them being the *Labour Report*, 1962 and 1963—*No.* 50, which contains a detailed description of the Index.

RETAIL PRICE INDEX NUMBERS, 1901 TO 1965

The index numbers shown in the following table are presented as a continuous series, but they give only a broad indication of long-term trends in retail price levels. They are derived by linking a number of indexes that differ greatly in scope. The successive indexes used are : from 1901 to 1914, the " A " Series Retail Price Index ; from 1914 to 1946–47, the " C " Series Retail Price Index ; from 1946–47 to 1948–49, a composite of Consumer Price Index Housing Group (partly estimated) and " C " Series Index excluding Rent ; from 1948–49 to 1965, the Consumer Price Index.

SECTION 2—WAGES

THE BASIC WAGE

The concept of a " basic " or " living " wage occurs commonly in the determinations of wage fixing authorities in Australia, although it may vary in definition. Originally the term was understood to mean the minimum or " basic " wage necessary to provide a reasonable standard of comfort for the average worker and his family. In later years, however, economic factors have been taken into account and, in determining specified minimum rates of wage, consideration has been given to the capacity of industry to pay those rates.

There are two tribunals which have authority to declare basic wage rates applicable in Western Australia. They are the Commonwealth Conciliation and Arbitration Commission, and The Western Australian Industrial Commission established by the Industrial Arbitration Act Amendment Act (No. 2), 1963 to replace the former Court of Arbitration.

By an amendment of 1949 to the Commonwealth Conciliation and Arbitration Act, the basic wage for an adult male worker is defined as " that wage, or that part of a wage, which is just and reasonable for an adult male, without regard to any circumstance pertaining to the work upon which, or the industry in which, he is employed." The Act contains a similar definition of a basic wage for females. Before the inclusion of this amendment, the Act empowered the Court to prescribe a " minimum rate of wage " but it neither defined, nor provided for the determination of, a specific " basic wage." In general terms, however, the basic wage was understood to be identifiable as the minimum wage, including " loadings," payable to an adult unskilled labourer. A " loading " may be defined as an addition to the " basic " wage as compensation for some peculiar condition of labour or environment or other circumstance, and not by way of " margin for skill."

The Industrial Arbitration Act, 1912–1963 (State) defines the basic wage as " a wage which the Commission considers to be just and reasonable for the average worker to whom it applies." The Commission must have regard to the needs of the worker to enable him to live in reasonable comfort. By an amendment of 1950 the Commission is required to take into consideration the economic capacity of industry but, in so doing, shall not reduce the basic wage below an amount which it deems necessary to maintain this reasonable standard of comfort.

A brief account of the development of the Commonwealth and State basic wages from inception is given in Part XII of the *Statistical Register* for 1960–61 and earlier issues, and is continued in the *Official Year Book of Western Australia.*

INDUSTRIAL ARBITRATION

The Commonwealth Conciliation and Arbitration Commission was established in 1956 by an amendment to the Conciliation and Arbitration Act which had the effect of allocating to the Commission the arbitral functions and to a Commonwealth Industrial Court the judicial functions formerly carried out by the Commonwealth Court of Conciliation and Arbitration. As prescribed in the Act, the Commission consists of a President, not less than two Deputy Presidents, a Senior Commissioner and not less than five Commissioners. At the 31st December, 1965 there were, in addition to the President and the Senior Commissioner, five Deputy Presidents and ten Commissioners. The Act also provides for the appointment of Conciliators.

The Commonwealth Industrial Court consists of a Chief Judge and four other Judges.

The Industrial Arbitration Act Amendment Act (No. 2), 1963, which came into operation on the 1st February, 1964, abolishes the former Court of Arbitration and establishes The Western Australian Industrial Commission and the Western Australian Industrial Appeal Court.

The Western Australian Industrial Commission consists of a Chief Industrial Commissioner and three other Commissioners. The Act provides that a Commissioner sitting or acting alone constitutes the Commission and may exercise all the powers and jurisdiction of the Commission.

The Commission is empowered to inquire into any industrial matter or industrial dispute in any industry and to make orders or awards fixing the prices for work done by, and the rates of wages payable to workers ; fixing the number of hours and the time to be worked in order to entitle those workers to the wages so fixed ; limiting the hours of piece workers ; fixing the rates for overtime, work on holidays, shift work, week-end work and other special work, including allowances as compensation for overtime ; determining any industrial matter ; and declaring what deduction may be made from the prices or wages of workers for board or residence or board and residence provided for workers and for any customary provisions or payments in kind conceded to such workers.

The Commission in Court Session is constituted by not less than three Commissioners sitting or acting together. Appeals from decisions of a single Commissioner are heard and determined by the Commission in Court Session. Such appeals are restricted to the evidence and matters raised in the proceedings before the single Commissioner.

The Act requires that basic wage determinations shall be made by the Commission in Court Session. The Commission made its first adjustment to the basic wage on the 27th April, 1964, when it prescribed increased rates to apply on and from that date.

The Western Australian Industrial Appeal Court consists of three Judges, one of whom is President of the Court. The President and the other members are nominated by the Chief Justice of Western Australia. Certain of the functions, powers and jurisdiction conferred on the Court may be exercised by any member, on the nomination of the President, sitting or acting alone. An appeal lies to the Court from any decision of the Commission or the Commission in Court Session, but only on the ground that such decision is erroneous in law or is in excess of jurisdiction.

† Annual Declaration. (*a*) Defined for basic wage purposes as the area comprised within a radius of 15 miles from the General Post Office, Perth. (*b*) As defined in the Land Act but excluding the Metropolitan Area. (*c*) Rates for divisions shown not specifically declared by Court. (*d*) The rates of $8·50 for males and $4·59 for females applied only to certain specified Goldfields Areas. (*e*) Rates declared in Basic Wage Adjustment Order No. 1 issued under the authority of National Security (Economic Organization) Regulations. (*f*) Beginning of first pay-period. (*g*) Beginning of next succeeding pay-period. (*h*) Interim Basic Wage declaration authorized under amendment to National Security (Economic Organization) Regulations, operative first pay-period after date thereof. (*i*) Special determination incorporating increase of $2·00 for males and $1·50 for females. (*j*) Female rate increased to 65 per cent. of male rate as from 1st December, 1951. (*k*) Female rate increased to 75 per cent. of male rate from beginning of first pay-period commencing on or after this date. (*l*) On the 22nd September, 1964, The Western Australian Industrial Commission, after a comprehensive inquiry, declared the rates shown to apply uniformly throughout the State. Subsequent variations have continued to be made on this basis.

SECTION 3—EMPLOYMENT

NOTE—In addition to the employment data appearing in this Part, details of the numbers of persons engaged in particular activities are given elsewhere in the *Statistical Register*. Part IV, for example, shows the numbers employed in railway operations, road passenger transport and ferry services and post, telegraph and telephone services. Part V gives details of employment on rural holdings and in fishing and pearling ; Part VI, in factories ; Part VII, in mining and quarrying ; Part IX, in hospitals and infant health services ; and Part X, in educational institutions.

INDUSTRY OF THE POPULATION

The Census

The most detailed and comprehensive statistics of employment of the population are those which are derived from the periodic Population Census. The population of Western Australia, as enumerated at the Census of 30th June, 1961, is classified according to industry in Tables Nos. 12, 13 and 15, and according to occupational status in Tables Nos. 14 and 15.

For statistical purposes, industry may be defined as any single branch of productive activity, trade or service. It is concerned with the activities of persons, firms or businesses considered as a group producing the same commodity, performing the same process or providing the same service. All persons engaged in any such branch of economic activity are classified industrially as belonging to that particular branch irrespective of their personal occupation within the industry. Examples are :—Mining, which includes, in addition to miners and prospectors, such persons as laboratory technicians, transport workers and office staff employed by mining companies ; Shipping, which covers staff members of shipping companies and agencies, as well as ships' crews ; professional activities such as Medicine, Law and Architecture which include not only qualified practitioners but also persons employed by them as, for example, receptionists, law clerks and draftsmen.

It should be noted that the particulars shown under *Public Authority Activities (N.E.I.)* are residual figures comprising those persons in the administrative sphere of general government, local government and foreign consular services who have not been classified elsewhere. They do not, therefore, represent the total numbers of persons engaged in or attached to all fields of government service, Commonwealth, State or Local. For example, employees of the Railways Commission have been assigned, in accordance with evidence contained in their census schedules, to Railway workshops in the sub-group *Manufacture, Assembly and Repair of Ships, Vehicles, Parts and Accessories* ; to Motor bus services in the sub-group *Road Transport* ; to Construction and maintenance of permanent way in the sub-group *Construction Works and Maintenance (other than Buildings)* or to Rail services under *Rail and Air Transport*. Further examples of this allocation of government workers to industries other than *Public Authority Activities (N.E.I.)* are provided by Departments such as Education, Public Works, Postmaster-General's, Repatriation, and local government authorities.

For more comprehensive and detailed data relating to the industry and occupational status of the population of Western Australia, the reader is referred to *Census of the Commonwealth of Australia 30th June, 1954, Volume V—Western Australia ; Detailed Tables*, and the corresponding volume for the 1961 Census, published by the Commonwealth Statistician.

The figures in Tables Nos. 12–15 exclude particulars of full-blood aborigines.

Estimates of Employment

In addition to employment data provided by the census, there are available monthly estimates of the number of wage and salary earners in civilian employment, excluding employees in rural industry (comprising agriculture, grazing and dairying) and private domestic service. The prime purpose of this series is to measure, as nearly as possible with available data, *current monthly trends* in employment in the defined field.

Estimates for months prior to June, 1954 are not available on a basis comparable with that used for June, 1954 and later. The statistics are based on comprehensive " benchmark " data derived for the purpose from the Population Censuses of June, 1954 and June, 1961. Figures for periods between and subsequent to the two benchmark points in time are estimates obtained from three main sources, (i) Pay-roll Tax Returns, which are lodged by all employers paying more than $400 per week in wages, other than those specifically exempted under the Pay-roll Tax Assessment Act 1941–1966, (ii) returns from government bodies, and (iii) some other direct current records of employment, *e.g.* for hospitals. The data thus derived are supplemented by estimates of the changes in number of wage and salary earners not covered by these collections. As they become available, particulars of employment obtained from other collections, notably the annual factory census and the censuses and sample surveys of retail establishments are used to check and, where desirable, to revise estimates in relevant sections. The figures shown for *Manufacturing* have been revised from July, 1964 in accordance with the results of the factory census of 1963–64 and 1964-65.

The estimated monthly figures are derived mainly from reports supplied by employers on an enterprise or establishment basis. The benchmark figures are derived from personal particulars supplied by individual respondents on population census schedules. However, the industry dissections of census information have been adjusted, as nearly as may be, to an "enterprise/establishment" reporting basis. The industry classification used is that of the Population Census of June, 1961.

The estimates relate to wage and salary earners on pay-rolls or *in employment* in the latter part of each month, as distinct from numbers of employees *actually working* on a specific date. Some persons working part-time are included.

Employees in rural industry and in private domestic service are not included in the estimates because the available data are inadequate.

Employees of government and semi-government authorities are included in the figures shown in Tables Nos. 17 and 18. Estimates of the numbers employed by Commonwealth, State and Local Government authorities are available separately and are published in Table No. 19.

All estimates have been rounded to thousands (correct to the first place of decimals) without adjustment to totals. For this reason, figures do not in all cases add to the totals shown.

OCCUPATIONS OF THE POPULATION

Occupation is defined as the nature of the work which a person performs, and implies *personal* performance. It may be based on the material treated, the process carried out or the type of service rendered by an *individual* worker. Thus the occupation of a person is the kind of work that he or she personally performs, as distinct from industry, which is defined as any single *branch of productive activity, trade or service* and is not concerned with the nature of personal performance.

In Table No. 16 the population of Western Australia at the Census of 30th June, 1961 is classified according to occupation. The figures have been amended in accordance with the final Census tabulations.

The Classification of Occupations used in the tabulation of the 1961 Census data has been adapted from and closely adheres to the principles embodied in the International Standard Classification of Occupations issued by the International Labour Office, Geneva, 1958. The International Standard Classification of Occupations was prepared after extensive discussions and research by world experts in this field, to provide an adequate classification framework for countries interested in occupational classification, and, at the same time, provide a basis for international comparison of occupational data obtained mainly from Censuses of Population.

The Australian Classification of Occupations contains 12 Major Groups, 73 Minor Groups and 348 Occupation Categories. In accordance with the International Standard Classification, occupations have been grouped by the general similarity of the characteristics of the work they entail. The most important feature of each minor group is that the occupations included are more closely related to each other than to occupations outside the minor group as regards the functions involved and the skills, knowledge and abilities required for satisfactory performance. Other factors taken into consideration in forming these groups have been material worked on, workplace environment, use of specialized equipment, etc.

The data appearing in Table No. 16 are restricted to the 12 Major Groups and the 73 Minor Groups of the Australian Classification of Occupations. Detailed particulars of the numbers in each of the 348 Occupation Categories are given in *Census of the Commonwealth, 30th June, 1961— Census Bulletin No. 32 ; Occupations of the Population : Australia, States and Territories* published by the Commonwealth Statistician.

The figures in Table No. 16 exclude particulars of full-blood aborigines.

No. 12—Industry of the Population : Censuses, 1954 and 1961

The table below shows the industry of the population of Western Australia at each of the Censuses of 30th June, 1954 and 1961, according to main industry groups. For the groups *Finance and Property ; Public Authority (N.E.I.) and Defence Services ;* and *Community and Business Services (including Professional)* the figures derived from the 1954 classification have been adjusted to accord with the classification used in 1961.

(*a*) The category "Not at Work" includes those who stated that they were usually engaged in work but were not actively seeking a job at the time of the Census by reason of sickness, accident, etc., or because they were on strike, changing jobs or temporarily laid off, etc. It includes also persons able and willing to work but unable to secure employment, as well as casual and seasonal workers not actually in a job at the time of the Census. The numbers shown as "Not at Work" therefore do not represent the number of unemployed available for work and unable to obtain it.

(†) Includes employees of government bodies (Commonwealth, State, Local and semi-government) on services such as railways, road and air transport, shipping, banks, post office, education, broadcasting, television, police, public works, factories, hospitals and institutions, as well as administrative employees. (*a*) Includes employees of semi-government authorities. (*b*) Excludes a small number of employees engaged in rural industry.

No. 20—Employment in Building according to Occupational Status and Type of Job

The data in Table Nos. 20 and 21 are derived from quarterly surveys of building operations. The figures relate to persons actually working on the jobs of builders who undertake the erection of new buildings and of government organizations which erect new buildings on their own account. They include persons actually engaged on alterations, renovations, repairs or additions *when these jobs are undertaken by such builders and organizations.* The figures also include working principals and their employees, sub-contractors and their employees, and men temporarily laid off on account of weather. They exclude those builders (and their employees) who undertake only alterations, renovations, repairs or minor additions. Men working on owner-built houses are also excluded.

Builders are asked to give details of the persons employed on a *specified day* but, because some persons (such as electricians, plasterers and plumbers) may work on more than one job on the same day for different contractors, duplication may occur.

BUILDING STATISTICS

No. 31—Building Permits and Approvals

Statistics of projected building operations comprise—

(a) *Private :* Building permits issued by local government authorities to private persons and firms for operations in areas subject to building control, including houses for which financial assistance is afforded by government instrumentalities, *e.g.*, War Service Homes Division.

(b) *Government :* Contracts let or day labour work authorized by government, semi-government and local government authorities.

Additions valued at $10,000 or over are treated as " new " buildings. The value of land on which the projected buildings are to be erected is not included in the values shown.

(*a*) The particulars shown for the Shire of Swan-Guildford relate to that part of the Shire (the South Ward and Guildford Ward) situated in the Metropolitan Statistical Division. (*b*) Individual living units. (*c*) Particulars included in first two columns of table. Comprises houses and flats for *private* occupancy to be constructed under government-sponsored housing schemes either for rental or eventual sale.

No. 33—Building Operations: New Buildings Completed (*a*)

The figures in this table cover the operations of all builders who accept contracts for the construction of new buildings, "day labour" building by Governmental agencies and the activities of "owner-builders."

The term "Owner-built" refers to buildings actually erected by the owner or under the owner's direction without the services of a contractor who is responsible for the whole job.

The value of land on which the buildings were erected is not included in the values shown.

(†) The State Housing Commission was constituted in January, 1947 to replace the former Workers' Homes Board. Completions shown for periods prior to that date represent operations of the Board. (‡) Comprises houses and individual flat-units. (*a*) Homes built at Kwinana New Town under the provisions of the Oil Refinery Industry (Anglo-Iranian Oil Company Limited) Act of 1952. (*b*) The figures shown represent housing units built by charitable organizations in connexion with which the Commission provided design and supervisory services. (*c*) Comprises 138 units completed under the Government Employees' Housing Scheme, 68 units under the provisions of the Laporte Industrial Factory Agreement Act, 1961 and 30 units for the B.H.P. Integrated Steelworks.

SUMMARY OF DWELLINGS—CENSUSES OF 1954 AND 1961

NOTE—The following definitions are relevant when considering the figures given in Tables Nos. 36–48.

Occupied Dwelling : An occupied dwelling is any habitation occupied by a household group living together as a domestic unit, whether comprising the whole or only part of a building. The term has therefore a very wide reference and includes, in addition to houses and flats, a great variety of "dwellings" ranging from a single-room shack to a multi-roomed hotel or institution. Occupied dwellings are classified into "private" and "other than private" dwellings.

Private Dwelling : Private dwellings are further classified into the following four categories—

Private House : Private Houses include houses, sheds, huts, garages, etc., used for dwelling purposes, and shared private houses for which only one Householder's Schedule was received.

Share of Private House : A Share of a Private House is a portion of a shared private house which is occupied separately and for which portion a separate Householder's Schedule was furnished.

Flat : A Flat is part of a house or other building which can be completely closed off and which has its own cooking and bathing facilities.

Other Private Dwelling : These include private dwellings such as rooms, apartments, etc., which are parts of buildings but are not self-contained units.

Other than Private Dwelling : These include Hotels ; Motels ; Boarding Houses, Lodging Houses and Hostels ; Educational, Religious and Charitable Institutions ; Hospitals ; Defence and Penal Establishments ; Police and Fire Stations ; Clubs ; Staff Barracks and Quarters, etc.

Divisions of State :

Metropolitan Urban comprises the Metropolitan Statistical Division (see Map of Western Australia in Part V of the *Statistical Register*).

Other Urban comprises all towns outside the Metropolitan Statistical Division with a population of more than 1,000 persons (excluding full-blood aborigines) at the Census.

Rural relates to all other parts of the State.

The figures in Tables Nos. 36–47 exclude particulars of dwellings occupied solely by full-blood aborigines.

(*a*) Prior to 1961 single self-contained dwellings attached to or situated above offices, shops, etc., were classified as private houses irrespective of the description stated in the Householder's Schedule. In 1961 such dwellings if described as self-contained flats were classified as flats. (*b*) Includes "caretakers' quarters" which in 1961 were classified as private dwellings.

RETAIL SALES STATISTICS

In the tables in this section, the particulars shown relate to sales of goods (as distinct from services, accommodation, entertainments, meals, etc.) by establishments which normally sell goods by retail to the general public from shops, rooms, kiosks and yards.

The data given in Tables Nos. 52–56 for the years 1956–57 and 1961–62 were obtained from Censuses taken in respect of those years, and have been abstracted from *Census of Retail Establishments and Other Services : Year ended 30th June, 1962 ; Bulletin No. 6—Western Australia*, published by the Commonwealth Statistician. For complete details of the tabulations and a comprehensive description of Census concepts and procedures, the reader is referred to this Bulletin, which is one of a series dealing separately with each of the Australian States and Territories. The information appearing in Table No. 51 is extracted from a quarterly statistical statement *Retail Sales of Goods*, which is issued by the Commonwealth Statistician and contains similar information for each of the Australian States. The figures are estimates derived from a sample survey of retail establishments conducted each quarter by the Commonwealth Bureau of Census and Statistics and are on a basis comparable with the 1961–62 Census of Retail Establishments.

Scope of Retail Census

In general, establishments with retail sales of goods amounting to less than $1,000 in the Census year are not included in the Census tabulations.

In addition to retail shops, as generally understood, the Census *includes* the retail activities of the following :—

Licensed hotels, motels, wine saloons and refreshment rooms ; unlicensed hotels and motels which have dining rooms open to the public

Bakeries, whether sales are made from retail premises or from a vehicle (provided that sales from vehicles are made on the baker's own behalf)

Tailors (except tailors who only make up customers' materials)

Garages and service stations, motor vehicle retailers, used-car lots

Gas and electricity suppliers (in respect only of their retail sales of appliances)

Fuel and ice merchants with retail premises

The following establishments are *excluded ;* unless they make sales by retail to the general public from fixed premises :—

Opticians and optometrists

Laundries and dry cleaners (included in a supplementary collection)

Theatres (motion picture theatres were included in a supplementary collection)

Timber yards and joinery works

Brick works

Roofing tile works

Establishments providing trade services such as carpentry, electrical contracting, plumbing, upholstery, panelbeating and motor body building, monumental masonry, etc.

Real estate agencies, stock and station agencies

Newspaper publishers and printers

Photographic studios

Dressmakers

Establishments catering for special occasions (races, sports meetings, etc.)

Herbalists

Lending libraries

Market or flower gardens, nurseries, dairies, poultry farms, chick hatcheries, which sell direct (either on site or from delivery vehicles) and which do not conduct a shop or regular roadside stall, also are *excluded.*

Organizations such as clubs and societies making sales to their own members are excluded from the main Census collection, but a supplementary collection was made, covering sales by *licensed* clubs.

The design of the Census is such that particulars of retail sales relate principally to sales, to the final consumer, of new and second-hand goods generally used for household and personal purposes. For this reason, sales of building materials ; farm and industrial machinery and equipment ; earth-moving equipment, etc. have been excluded from the Census. For the same reason, and also because of difficulties in obtaining reliable and complete reporting, sales of builders' hardware and supplies ; business machines and equipment ; grain, feed, fertilizers and agricultural supplies ; and tractors were excluded from the 1961–62 Census. The 1956–57 Census particulars as published in Tables Nos. 52–54 have been revised to exclude sales of these commodities. At both Censuses, retail sales of motor vehicles, parts, etc. were included whether for industrial, commercial, farm or private use.

Where sales of goods other than new motor vehicles are made on commission, the basis of collection is for sales to be included in the principal's returns and not in those of the agents. In the 1956–57 Census, this practice was also adopted for sales of new motor vehicles. However, in that Census difficulties were experienced in ensuring that some sales of new motor vehicles were not reported twice (*i.e.* by both the principal and the agent). Another effect of the 1956–57 procedure was that sales of new motor vehicles made on a commission basis through country agents were generally shown in statistics for the Metropolitan Statistical Division, where the businesses of the principals are mainly located, and this tended to present an unrealistic pattern of the area distribution of total new motor vehicles sales. Because of these factors, it was decided that, for the 1961–62 Census, sales of new motor vehicles should be included on the return of the establishment which made the sale to the final consumer, irrespective of whether the sales were made by a commission agent or by a principal. It has not been practicable to revise the 1956–57 figures to take account of the changed collection arrangements.

There are certain types of establishments (*e.g.* licensed clubs and canteens) which, although they make sales to consumers, are excluded, by definition, from the Census. For this reason, the aggregates shown for some commodity groups are less than the total value of goods in those groups actually sold to consumers. This applies in particular to tobacco, cigars, cigarettes, beer, wines and spirits. Sales of cigarettes are made also by means of vending machines operated by independent organizations.

Type of Business

All establishments were classified according to Type of Business. For the purposes of such classification, reference was made to the type of goods sold or service rendered as indicated by the commodity sales and other takings recorded on the Census returns. In general, establishments were coded to the Type of Business which corresponded to their predominant " type " of goods sold or service rendered (*i.e.* the " type " with the largest sales or takings).

The basis of coding establishments to Type of Business was broadly the same in the two Censuses. However, there are some establishments whose returns in the two Censuses showed relatively small differences in the distribution of sales between commodity groups, and which are coded to different Types of Business in the respective Censuses. For example, an establishment whose 1956–57 Census return indicated that Electrical Goods was the predominant "type " of goods sold, with Clothing and Drapery as the " type " with the next largest sales would have been coded as an Electrical Goods Store in the 1956–57 Census. If a slight change occurred between the two Censuses, with the result that the same establishment's 1961–62 Census return indicated that Clothing and Drapery was the predominant " type " of goods sold, the establishment would be coded as Clothier and Draper in the 1961–62 Census (unless the establishment satisfied the definition for Department Store).

In the 1961–62 Census, a separate Type of Business classification was provided for Department Stores. In the 1956–57 Census, such establishments were originally coded to the type of business appropriate to the distribution of sales by commodity groups. However, the 1956–57 figures have been revised to a basis consistent with that used in 1961–62, and consequently comparisons are not affected.

Statistical Retail Areas

In general, Statistical Retail Areas comprise groups of contiguous local government areas (*i.e.* Cities, Towns and Shires). For the 1956–57 Census the local government area boundaries were those existing as at the 1st January, 1957 and for the 1961–62 Census, as at the 1st January, 1962. Although some boundary changes took place between these dates they were such as not to invalidate intercensal comparisons of data relating to Statistical Retail Areas or Statistical Divisions.

Names of Local Government Areas included in each Statistical Retail Area and Statistical Division are shown in Table No. 54.

Persons Working on Retail Activities

Traders were asked to supply details of the number of persons working at the establishment on the last pay-day in June, 1962. The figures include persons normally working at the establishment who were absent on account of sickness or were on holiday. Traders were asked to provide separate details of persons working mainly on retail activities and others working mainly on wholesaling, manufacturing, etc. For this purpose, retail activities were to include retail selling (including bar trade), repair work, hairdressing, preparation and serving of meals, accommodation, retail packing and delivery services, retail supervisory, clerical and accounts staff, etc. Only details of persons working mainly on retail activities are shown in Table No. 56. In the case of chain stores and other organizations operating several retail establishments, special inquiries were made to obtain details of persons working on activities associated with retail selling but located at premises other than retail establishments (*e.g.*, central warehouses, offices not located at retail establishments, etc.). These details have been included in the return for the largest retail establishment operated by each organization.

AUSTRALIAN DECIMAL CURRENCY

On the 14th February, 1966, as provided by the Currency Act 1965 a dollar ($)/cent (c) decimal currency system, with one dollar equal to 100 cents, was introduced in Australia.

The relationship between pounds, shillings and pence, and dollars and cents, as prescribed in Section 8 of the Act is as follows :—

1 pound = 2 dollars ($2)
1 shilling = 10 cents (10c)
1 penny = $\frac{5}{6}$ths of a cent ($\frac{5}{6}$c)

In this publication, all monetary amounts have been converted to their equivalents in the new system.

The Australian dollar ($A) is equal in value to eight shillings sterling or $US 1.12.

(a) Excluding full-blood aborigines. (b) Estimated. Figures for 1961 and later are subject to revision when the results of the 1966 Census become available. (c) Population in the area constituted as Perth Statistical Division, with effect from 1st January, 1966. The Perth Statistical Division comprises the former Metropolitan and Swan Statistical Divisions. (d) Figures shown for 1933 and later years represent recorded migration and have not been adjusted to conform to Census results. (e) Recorded net interstate and oversea migration together with adjustments for differences between the population as estimated and as actually enumerated at census dates. As records of migration (particularly interstate) are known to be incomplete, the whole of the difference found at each census has been attributed to migration, and the recorded migration figures have been adjusted accordingly. (f) Not available.

(*a*) From 1915, year ended 30th June. (*b*) Excluding plywood and veneers and small quantities of timber for which no super. footage is recorded. For the years 1906 to 1921, figures are approximate. (*c*) Figures for the years 1949–50 to 1951–52 represent oversea exports only and exclude small consignments to other Australian States. Those for 1952–53 and later years include small consignments of cooked whole crayfish to other Australian States. (*d*) A major oil refinery began production in 1954–55. In some earlier years there were small consignments of re-exported products which were of little significance and are not shown. (*e*) Six months ended 30th June. (*f*) Precise information not available, but it is known that the value of exports was about $500,000. (*g*) Figure for 1956–57 excludes, and that for 1957–58 includes, an amount of $22,012 representing the value of cattle hides exported during 1956–57 but not recorded until 1957–58.

(a) From 1906, at 30th June ; for earlier years, at 31st December. (b) Comprises allocations by Lands Department and certain leases and licences issued by Mines and Forests Departments. Apparent decrease in 1951 due mainly to revisions in records of Lands Department. (c) At 31st December for 1941 and earlier years ; from 1942, the figures shown relate to 31st March in the following year. (d) Comprises shorn, dead and fellmongered wool. Excludes wool exported on skins. For 1947 and earlier, year ended 31st December ; figures shown for 1948 and later are for the year ended 31st March in the following year. (e) Figures for 1949 and 1951 to 1955 exclude distributions of profits under the 1939–1945 War-time Wool Disposals Plan aggregating $13,869,934. Separate State figures are not available for distributions made from 1956 to 1958 when payments were virtually complete. (f) Not available. (g) Not available at time of publication. * Revised.

(*a*) Comprises gold refined at the mint and gold contained in gold-bearing materials exported. (*b*) Australian currency value including amounts, totalling $2,760,062 for the years 1952 to 1965, distributed by the Gold Producers' Association Ltd. from premiums on sales of Western Australian gold. Also includes net subsidy payments by the Commonwealth Government, under the Gold-Mining Industry Assistance Act 1954–1965, totalling $12,860,976 in the years 1955 to 1965. (*c*) From 1915 figures relate to year ended 30th June. (*d*) Prior to 1940 averages generally are based on exports of the previous season's wheat; from 1940 they relate to exports during the year ended 30th June. (*e*) Not available. (*f*) Exports negligible; average Metropolitan Market price shown. (*g*) For six months ended 30th June. (*h*) Not available at time of publication. * Revised.

(a) Figures generally are for the season or financial period ending in the following year. (b) Represents the estimated value of recorded production based on wholesale prices realized at the principal market. (c) In addition, the following amounts were paid as interim distribution of profits under the 1939–1945 War-time Wool Disposals Plan: in 1949, $3,629,478; in 1951, $3,629,478; in 1952, $2,325,324; in 1953, $368,104; in 1954, $2,120,460; and in 1955, $1,797,090. Separate State figures are not available for distributions made from 1956 to 1958 when payments were virtually complete. (d) Net value of production is derived by deducting from the gross value all marketing costs and the cost of certain goods (seed, fertilizer, pickling, sprays, dips, fodder, fuel and oil, etc.) used in the processes of production. (e) Not available.

(*a*) For statistical purposes a factory is defined as any establishment engaged in the processes of manufacturing, assembling, treating or repairing and in which four or more persons are employed during any period of the year, or power other than manual is used. (*b*) For 1924 and earlier, calendar year; from 1927, year ended 30th June. See also note (*l*). (*c*) Average over the full twelve months and includes working proprietors and, up to and including 1925–26, fallers and haulers employed by sawmills. (*d*) Figures for 1929–30 and later years exclude amounts drawn by working proprietors. (*e*) Selling value "At Factory Door." (*f*) Value added in course of manufacture, representing sum available for payment of wages, rent, interest, depreciation, advertising, insurance, etc., and profit. (*g*) For years prior to 1964–65, figures include all types of standard size bricks. Prior to 1925–26, they also include firebricks and blocks. For 1964–65, figures represent clay bricks only (all sizes). (*h*) Includes plywood veneers in terms of super. feet and hewn timber produced by agencies other than "Factories." (*i*) For 1917 and earlier years, includes butter made on farms. (*j*) Short ton = 2,000 lb. (*k*) Not available. (*l*) Eighteen months ended 30th June. (*m*) Not available for publication. * Revised.

(a) The index numbers shown are so designed as to measure periodically the movement in retail prices of the specified groups of items in each city individually. They do not provide a measure of differences in absolute price level as between cities, nor of comparative costs of the groups of items. (b) Year ended June. (c) Weighted average.

(a) Employment estimates relate to the month of June; statistics of New Buildings Completed are for the year ended 30th June. (b) Estimated. Figures for years prior to 1954 as published in issues of the *Statistical Summary* for 1961–62 and earlier, are not comparable with this series. The figures shown for *Persons* are not in all cases equal to the sum of the numbers of *Males* and *Females*. Any such discrepancies are due to rounding to thousands. (c) Excludes the value of land. (d) Individual living units. (e) Includes value of houses and flats shown in preceding columns. (f) Not available on basis comparable with that for 1954 and later—see note (b).
